Conference On Learning Potential And Human Modifiability

The Graduate Schools of Psychology and Education of Touro College, The Feuerstein Center of Jerusalem, and McGraw-Hill Educational Division announce an inaugural conference to introduce the innovative theories and methods developed by Professor Reuven Feuerstein to maximize the learning potential of children across the cognitive spectrum.

The conference, "Learning Potential and Human Modifiability: Implications for Education and Therapy," will be held on May 4 from 4:30 to 8:30 p.m. at the McGraw-Hill Corporate Conference Center, 1221 Avenue of the Americas, in Manhattan. Conference registration will begin at 3:15 p.m.

Learning how to learn is one of the most important tools a teacher can provide to students. Feuerstein has developed an innovative theory and methodology to address this issue and to improve the scholastic performance of all students.

Conference speakers include:

Dr. Bernard Lander, president and founder of Touro College; Dr. Reuven Feuerstein, founder and director of The Feuerstein Center of Jerusalem; Rabbi Rafi Feuerstein, vice-chairman of The Feuerstein Center of Jerusalem; LaMar Miller, dean, Touro College Graduate School of Education; Dr. Robert Sternberg, dean,

Tufts University School of Arts & Sciences and past president of the American Psychological Association; and Dr. John J. Ramos Sr., superintendent, Board of Education, Bridgeport, Connecticut.

Beginning in the summer, Touro College's Graduate Schools of Psychology and Education in partnership with the Feuerstein Center will be offering seminars and graduate courses, training educators to integrate Feuerstein's theories and methods into traditional scholastic programs.

The conference is free of charge. Due to limited space, early confirmation of attendance is recommended. To register, please contact the conference coordinator at 212-463-0400 x5376 or feuerstein-conference@touro.edu.
