touro.edu/library
Midtown Main Campus of Touro College
320 West 31st Street, New York, NY 10001

The Touro College and University System is a Jewish-sponsored independent institution of higher and professional education serving the larger American community. Approximately 18,000 students are currently enrolled in its various schools and divisions. Touro College is accredited by the Middle States Commission on Higher Education, 3624 Market Street, Philadelphia, PA 19104, phone number (267) 284-5000. The Middle States Commission on Higher Education is an institutional accrediting agency recognized by the United States Secretary of Education and the Council for Higher Education Accreditation.

All Touro branches in California and Nevada are accredited by the Accrediting Commission, for Senior Colleges and Universities of the Western Association of Schools and Colleges, 985 Atlantic Avenue, #100 Alameda, CA 94501, phone number (510) 748-9001.

For more information on the Touro College & University System, please visit us on the web at: www.touro.edu or call (212) 463-0400.

Message from the President

At Touro College and University System, we understand that the education we provide to our students can only be as refined as the scholarship of our instructors. We know that our investment in faculty research is what sets us apart as a premier institution of higher learning, and a national and global leader in academic research.

This compilation, which is the tenth annual compendium of faculty publications, represents Touro’s commitment to leadership on multiple research frontiers. As in the past, this volume features the work of the faculty at Touro College & University System as well as at New York Medical College. It contains over 650 authors and represents the immense quality of scholarship arising out of our institution. For a seamless reading and reference experience, this book contains an alphabetical index and organizes entries by school. The Touro College & University System 2018 Faculty Publications Book is an extension of the Touro Scholar Database, which contains over 5,600 searchable entries. As the sixth volume to combine the investigative output of Touro College and New York Medical College, it highlights our institution’s commitment to interdisciplinary work and exhibits the strong research synergies our partnership has created. As in past volumes, I invite you to search this book as well as Touro Scholar, our institutional repository (https://touroscholar.touro.edu/), to discover fascinating research in a multitude of disciplines.

Our faculty’s continued commitment to scholarship reinforces our mission of achieving excellence in higher education, and our dedicated library staff and administration will continue to support all efforts to deepen that scholarship and increase collaborative research opportunities across our institution.

Sincerely,

Dr. Alan Kadish
President
Message from the Provost for the Graduate and Professional Divisions

Dear Members of the Touro College & University System Community,

Congratulations to the Touro College & University System (TCUS) community of scholars whose work is contained in this volume. It is a demonstration of the thought leadership and intellectual inquiry that advances knowledge and the academic values that TCUS strives to support and foster within the institution. The works referenced herein represent a wide spectrum of disciplines and interests, important collaborations and in some cases, the result of years of investigation and/or funded research. Clearly, all these efforts reflect the passion of our faculty scholars who share their expertise and perspectives for the greater good.

Today, more than ever, the work of our faculty is of high impact—the days of manually searching previous work located only in hard copy in a library in another state or even country has ended. Thanks in large part to the Touro Library Staff, the ideas contained in the books and articles written by our faculty and detailed in this publication are now available digitally and worldwide, thereby increasing the impact of the work and connecting a vibrant international community of scholars. Further, this has been accomplished by the implementation of our institutional repository, Touro Scholar. This online scholarly archive has been around for three years, and has already amassed 5,559 publications. People in 189 countries have downloaded these publications 64,260 times. Further, since the inception of Touro Scholar, 4,891 institutions world-wide have accessed our publications. Truly, this shows what Touro has to offer to the academic community at large.

Thank you to the leadership and staff of the Touro Library who support the faculty and enable the robust quality of research that takes place in our institution. Thank you also to the faculty who collaborate and ignite the ability of their colleagues and students in research endeavors that advance knowledge and make a difference for humanity.

Patricia E. Salkin
Provost for the Graduate and Professional Divisions
Touro College
Message from the Provost for Biomedical Research

A core goal of any university is not just the generation of new knowledge, but sharing that knowledge through publication. While the peer review process evaluates what appears in the scientific literature, it is important to remember that what we publish becomes accessible to the public and a projection of our scholarship standards within the scientific community. They form a record of individual achievement and they figure prominently in how the outside world evaluates the reputation of the Touro College and University System. Moreover, as a grant applicant and peer reviewer of proposals, I can assure you no application makes it to the successful finish line without a solid record of publications.

After three years as Provost for Biomedical Research and Chief Biomedical Research Officer for the Touro College and University System, I find myself continually impressed by the wealth and breadth of scholarly activity among our faculty throughout our campuses. The enthusiasm with which our faculty has embraced the expansion of our research enterprise is constantly present. A true reflection of this ongoing process is for example the record number (167) of student and faculty posters at Touro College Research Day 2019, the attribution of prizes for best faculty research publications and student posters and the recognition of recipients of the President’s Faculty Research Development grants.

In the biomedical and health sciences we continue to build momentum through our Seed Funding Grant Program and establishing intellectual connections across the System. A noteworthy example of the latter was our second conference at New York Medical College on the Microbiome, in which we brought together our faculty and visitors to hear presentations from the forefront of basic research, clinical practice and the evolving industry in this vital area of scientific interest and potential.

These and other developments are testimony to the energy and excitement that have permeated our institution as we pursue research on multiple fronts. To my colleagues, whose citations in this volume are a
testimony to where we are and what we can yet accomplish, once more I congratulate you on your achievement.

Sincerely,

Salomon Amar, DDS, Ph.D.
Provost for Biomedical Research/Chief Biomedical Research Officer
Touro College and University System
Professor of Pharmacology
Professor of Microbiology and Immunology
Acknowledgments

As the new Scholarly Communications Librarian at Touro College and University System, I must first acknowledge the fundamental work of my predecessor Carrie Levinson with Touro Scholar, our institutional repository. Touro Scholar has successfully replaced our Faculty Publications Database in 2017. In 2018, Touro Scholar doubled in size with the addition of 2,388 new works. There were also 33,785 downloads by 3,053 institutions representing 174 countries worldwide. In 2019, we’re looking to initiate the new streaming video feature on Touro Scholar highlighting speeches, lectures and other events.

These projects showcasing faculty and student research would have been impossible to accomplish without the assistance of many people in the Touro College and University System/New York Medical College community:

- President Dr. Kadish, Executive Vice President Rabbi Krupka, Provost Salkin, and Provost Amar for continually supporting the library and this project;
- Esther Greenfield for her excellent attention to detail and editing talents, as well as ensuring that every year the book is polished and professional;
- Bashe Simon, Director of Touro Libraries, and Sara Tabaei, for her expert advice and supervision;
- Touro Libraries in California and Nevada, specifically Jason Fetty (Reference and Instruction Librarian at Touro University Nevada) for readily helping us to identify faculty at their campuses and validate their bibliographic information;
- Marie Ascher (Director), Nina Kurzban (Cataloger), Jovy O’Grady (NYMC Scholarly Communications Librarian) and the rest of the New York Medical College Health Sciences Library staff for their dedication in incorporating their 2018 publications into the Faculty Publications book and Touro Scholar;
- Liping Ren and Yan Chen for their expedient technical support;
- Marina Zilberman and Valerie Shrager, for their ready assistance with Russian translations;
- The Research Council Committee for their useful feedback and support.

We have successfully implemented PlumX, an altmetrics (alternative metrics) tool that provides insights into how people interact with Touro’s wealth of scholarship on social media and other online resources. We’re extremely excited about the global reach we’ve had in sharing both faculty and student work, including three student journals, and hope you will continue to help Touro Scholar develop and grow.

Donneer Missouri
Scholarly Communications Librarian
Note from the Library

The traditional role of libraries was to provide access to information and research to the general population. With the publication of the 2018 Faculty Publications Book, the Touro College & University System continues this tradition. The Faculty Publication book provides access to the research that was been done by the scholars and researchers of Touro College & University System. The dissemination of scholarship increases access to information worldwide. The library is proud to be the initiator and distributor of this important publication.

The publication continues to be an offshoot of Touro Scholar, our online repository, which highlights the scholarship produced by the Touro College & University System. Donneer Missouri, our new Scholarly Communication Librarian, worked diligently to oversee the publication of this book and we appreciate his enthusiastic and dedicated efforts.

Marie Ascher, NYMC Library Director, and her staff contributed greatly in compiling this work.

We value the support that the library receives from the President’s Office and we appreciate the encouragement that we receive from Dr. Kadish, President of the Touro College and University System.

The authors represented in these pages deserve our congratulations on their accomplishments. We encourage all faculty and staff members to share their research with library thereby making it available worldwide for scholarly research.

Bashe Simon
Director of Libraries
Note from the NYMC Library

Congratulations to all 2018 Touro and New York Medical College authors for your hard work in seeing your research through to publication and many thanks to the staff of the libraries of NYMC and the Touro College and University System who collaborate to organize this publication and the Touro Scholar institutional repository. I’d like to specifically thank Nina Kurzban, who puts her heart and soul into collecting information about the NYMC publications you see here. And Jovy O’Grady, Scholarly Communications Librarian, who leads the Touro Scholar effort at NYMC.

It is with great pleasure that we release the Faculty Publications book representing items published during 2018. For NYMC this listing represents the work of 365 authors in 385 papers, 7 books, 35 book chapters, and 192 published conference abstracts.

We continue to enter all citations and abstracts into the Touro Scholar (TS) repository. Touro Scholar is now the place to find all NYMC citations, and this year we have enabled self-submission to authors as well as adding NYMC Theses to TS. It is our hope that researchers will fully embrace the Open Access movement in the coming year and make deposit of their full text manuscripts into the repository part of their publishing process. Doing so will increase the availability of the publications which will mean for authors: more readership, more citations, and more overall value to the scientific and lay communities.

Many thanks to Donneer Missouri, Scholarly Communications Librarian at Touro Library, for work on the bibliography and on the Touro Scholar initiative – as well as Sara Tabaei for her enthusiastic and thoughtful leadership. We’ve come a long way from a print-only bibliography at NYMC where the first was published in 1993 (and only listed books).

As a library we are committed to supporting research at every step of the process and promoting the work of our faculty researchers. Through this publication and through Touro Scholar we make important steps toward this goal.

Omura, Y. (2018). Frequent waking up for urination &/or painful leg cramp(s) in advanced aged patients during sleep was one of important causes of fall & fracture which are major causes of disability & death. These problems can be reduced by simple change of available pillow from regular position to vertical position which can cover back of both head & part of chest which improve abnormal condition of spine & thymus gland function. *Acupuncture & Electro-Therapeutics Research, 43*(1), 1-18.

Omura, Y. (2018). Basic principles of Bi-digital O-ring test, particularly highly sensitive electromagnetic field resonance phenomenon between 2 identical molecules with identical weight and its clinical application for detection of any molecules including detection of specific cancers and micro-organisms and finding effective medication or materials and individualized optimal doses for safe, effective treatment of various medical and dental problems. *Dental Health: Current Research, 4*, 22-23.

Omura, Y. (2018). Clinical application of 8 unique beneficial effects of individually determined optimal dose of vitamin D3 for safe, effective treatment of cancer as well as prevention of possible cancer infection due to mixed infection of human papilloma virus-Type 16 (HPV-16) and intracellular single cell parasite Toxoplasma gondi as a potential source of cancer spread. *Journal of Cancer Science & Therapy, 10*, 31.
Omura, Y. (2018). Early, non-invasive, rapid detection of various cancers by 1) facial organ representation areas (including eyebrows, nose, upper & lower lips), 2) mouth, hand, & foot writing form, 3) rapidly changing part of QRS complex & rising part of T-wave of ECGS, 4) abnormal BDORT changes at thymus gland representation areas. *Allied Journal of Medical Research, 2*, 15-16.

Omura, Y. (2018). Human papilloma virus-type 16 (HPV-16) & human herpes virus-type 8 (HHV-8) in the presence of strong electromagnetic field are found to be important coexisting cancer-promoting factors & their potential causes. How to treat hopelessly advanced cancer patients with multiple metastases safely & effectively. *Journal of Cancer Science & Therapy, 10*, 27.

Omura, Y. (2018). Non-invasive, early diagnostic methods of various cancers and their metastases. role of coexisting contributing factors of human papilloma virus-Type 16 and Toxoplasma gondii infection and strong, electromagnetic field, etc. for rapid cancer development (some cancers may be infectious): Safe, effective treatment of various cancers using non-invasive, safe, effective, simple, individualized treatment by combined use of optimal dose of vitamin D3 and thymus gland stimulation. *Journal of Gastrointestinal & Digestive System, 8*, 30.

Omura, Y. (2018). Role of human papilloma virus-Type 16 (HPV-16) & Toxoplasma gondii infection as new, rapid contributing factor to existing factors such as strong electro-magnetic field, etc. for development of various cancers, safe, very effective, individualized treatment of cancers & their metastases using unique 8 beneficial effects of optimal dose of vitamin D3 and thymus gland representation area stimulation. *Allied Journal of Medical Research, 2*, 28-29.

# List of Publication Criteria

## Included

- Abstracts published in scholarly/academic journals
- Conference/symposium articles in published proceedings
- Articles in scholarly/academic/professional journals
- Bibliographies
- Books (authored/edited)
- Book chapters (authored/edited)
- Book/film reviews in academic publications
- Creative works – curated or published; not self-published (poetry, novels, short stories, published plays, art exhibits, musical scores and choreographed dance, audiovisuals)
- Encyclopedia entries (excluding Wikipedia)
- Evidence-based publications in peer-reviewed journals
- Letters to the editor, if published in peer-reviewed journals
- Monographs
- Patents
- Published dissertations (beyond ProQuest Dissertations and Theses)
- Technological/software products (e.g. apps, if published through iTunes or Google Play; not self-published)
- Test reviews in Mental Measurement Yearbooks
- Textbooks
- Translations of literary or scholarly work(s) from and into English, if translations are by the TCUS faculty member

## Excluded

- Announcements of presentations that are printed in conference/events program (including abstracts)
- Blogs
- Broadcast media
- CATs or CAPs (Critical Appraisal Topics or Papers)
- Committee reports
- In-house or departmental newspaper articles
- Interviews
- Job titles and responsibilities
- Opinion pieces
- Newspaper articles
- Newsletter items
- Obituaries/eulogies
- Pending patent applications
- Popular magazine articles
- Presentations, including poster presentations
- Unpublished technical reports & working papers
- Vanity presses
- Items that have the following description: “in press”, “forthcoming”, “advance access online”, “epubs”, “pre-pub online”, “corrected proofs” or any other kind of publications that do not have their bibliographic information available
Every effort was made to identify and include all Touro College and University System faculty authors who published between January 1, 2018 and December 31, 2018. We regret any omissions or inadvertent errors.

We invite faculty authors to submit their 2019 publications information to Donneer Missouri, Scholarly Communications Librarian, via email at donneer.missouri@touro.edu or by phone at 212-463-0400 ext. 55397, for inclusion of their publication(s) on Touro Scholar.
